Javascript Recap 2 Assignment

1. Write a function that returns the duplicates with the array?
   Example : [1,2,3,4] , // Expected output : [1,2,3,4,1,2,3,4] (USE ES6 Standards)

2. Given an array of integers and an integer target, return *numbers such that they add up to target*. (Challenging)
   Example: [2,11,7,15], target = 9
   // Expected Output : [2, 7]

   Function twoSum(array, target) { return [firstNum, secondNum] }

3. Write your own function to replace, Object.keys,
   a. Example - function ObjectToKeys(object) { return [key1, key2] }
4. Write your own function to replace, Object.values { return [value1, value2]
