Javascript Recap 2 Assignment

1. Write a function that returns the duplicates with the array?
   Example : [1,2,3,4] , // Expected output : [1,2,3,4,1,2,3,4] (USE ES6 Standards)

2. What are classes in javascript, explain using an example.

3. How do you do inheritance in classes, give an example.

4. What will happen if you write a constructor in a class more than once ?

5. Given an array of integers and an integer target, return *indices of the two numbers such that they add up to target*.
   Example: [2,11,7,15], target = 9
   // Expected Output : [0, 2].
